

## Minimum System Requirements

### System Requirements

- At least 1-GHz processor and 1 GB of RAM.
- Available browser updates applied for improved security that provides anti-virus and spyware protection.
- Microsoft® Windows® Vista Service Pack (SP) 2, Microsoft Windows 7/8/10 or Mac OS X. ***If you are still using Windows XP, you will need to use Google Chrome™ for an up-to-date, secure internet browser.***
- Cable, Digital Subscriber Line (DSL) or Integrated Services for Digital Network (ISDN) internet connection. Dial-up is not supported. ***Please note: Satellite connections often have difficulty supporting encrypted, Hypertext Transfer Protocol Secure (HTTPS) applications. Since this new version is HTTPS-encrypted for the safety of your financial information, some satellite cable connections may exhibit slow responses.***

### Display Requirements

- Desktop and laptop displays can be any height but must support at least a 1300-pixel width, otherwise you will need to scroll horizontally to see the entire screen.

### Browser Requirements

- Browser support is subject to change with little or no notice from the browser provider. We encourage you to configure your browsers for automatic updates. For the most secure and consistent experience on mobile devices and tablets, use our Mobile App instead of mobile browsers.

#### PC browser compatibility

Browser	Windows XP	Windows Vista SP 2	Windows 7 and Windows 8	Windows 10
Google Chrome 37 & later	Yes	Yes	Yes	Yes
Microsoft Internet Explorer 10.X			Yes	
Microsoft Internet Explorer 11.X			Yes	Yes
Mozilla® Firefox® 33 & later		Yes	Yes	Yes

#### Mac browser compatibility

Browser	Mac OS X 10.6 – 10.11
